Combination Person ./. Feng Shui - Transfer results to Word

Whether you have to provide degree of Facing or Site is decided by your choice of option "Chan/Yap".

The opposite will be calculated automatically.

If you want to calculate stars with non-opposite directions, you may set these directly in the Feng Shui part before running the transfer to Word.

You may choose from lot of cities all over Europe here, with adjustment to local time and summertime, if you choose to do so. A lot of cities around the world are provided also with local time, but you have to provide the summertime yourself at another sheet in the software.

With each click on a blue button you create a lot of pages with results in a Word document.
See the following examples for more specific information.

Upon delivery of the software the generated results are pre-defined.
You'll get a free session on Skype to get started though, and there you may also get some settings adjusted to your liking.

The software allows for adaptation to the teachings of a lot of schools, from methodology as well as terminology (see other documents at <http://www.my-own.pro/EN/> for more details).

This sheet allows to switch between settings according to GM Chan and GM Yap (or M. Kubny, a well-known BaZi master in Germany) with just one click, though the software may not always reflect the current teaching, as that may change over time. If you'd expect something some other way, please let me know, and I could talk to the teacher.

Should you prefer other settings, you can always choose from the manifold options provided elsewhere in the program – then just choose “Mix” here to reflect you made your own choice.

Results

I did not want to have to prepare several versions of this document, so in what follows several times you will find results for various schools one after the other.

For this, the program was run with one choice of settings first and another one thereafter, and then the results have been moved around by hand.

Each result is transferred to Word as an image, so later on these images can be moved around, enlarged or reduced, given comments just the way you like it, or moved to other documents.

This way you can prepare your own documentation of the project the way you want it, for yourself as well as for your client.

And it takes you just a few minutes to have professional graphics which will impress your clients.

Some results from the part on horoscopes

Lovely Friend # 0 h summer	19.08.1960 19:42	original time of birth
	19.08.1960 18:18	time of birth as used by the program

As a standard the time of birth will be adjusted to local time and summertime – which may be switched off. If summertime is not known to the software for a specific date and location, you may provide it yourself.

Some results from the part on Feng Shui

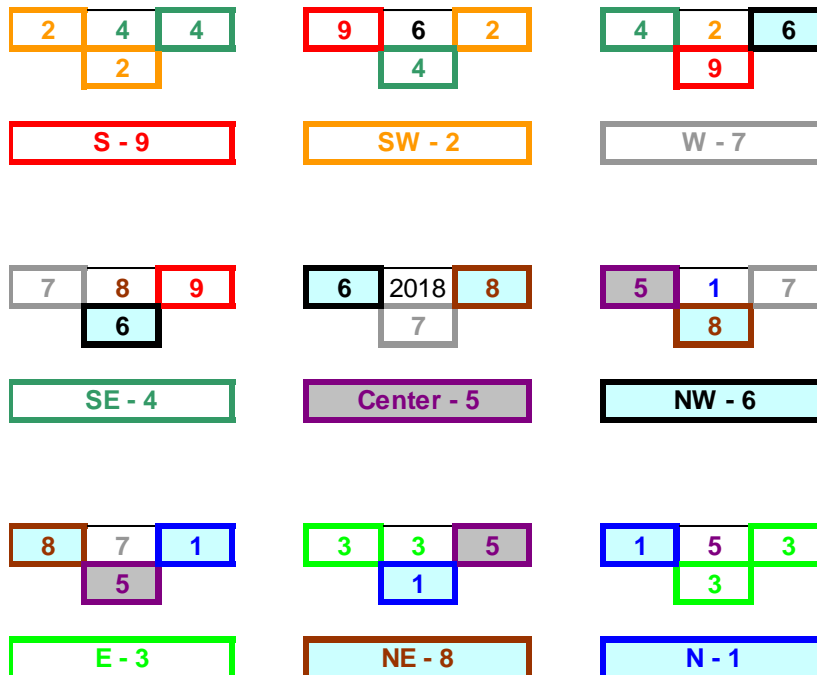

The main directions are displayed within the map – this way data used for calculations can easily be compared with compass readings at various walls.

Provided the map is rectangular, the compass rosette will be placed at the centre automatically.

*The sectors got colours according to their direction.
This may be switched off for further analysis later on.*

	1	12111	4-6-9	
Sitting				

Facing				
305	6	戌 丙	52	NW_1
	1	11211	1-2-3	
		303,75 - 309,375		292,5 - 307,5

Numbers in red signify that the value provided is near to the border of a Kua or a Mountain. This way it's easy to see whether it might be valuable to check for the compass reading.

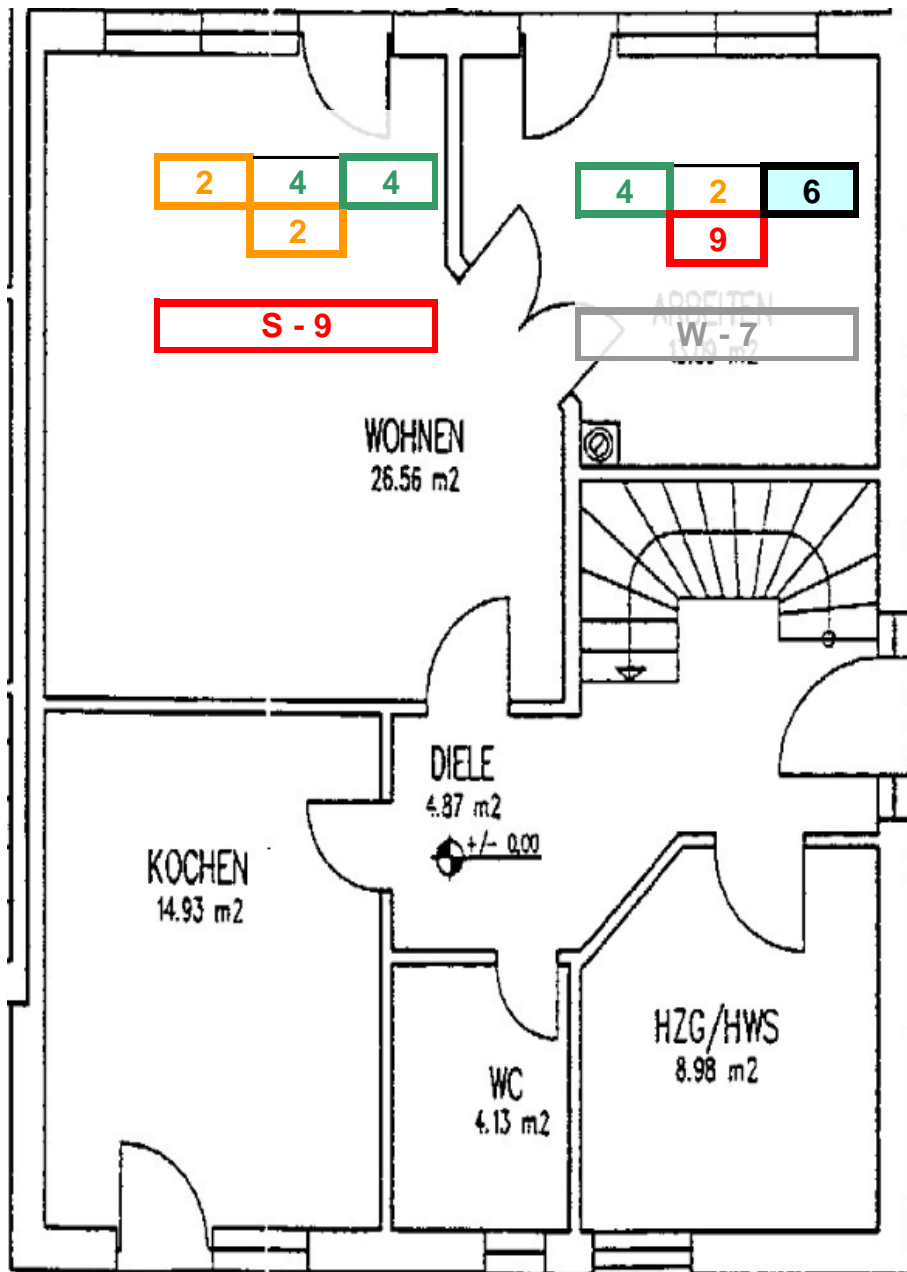

The "4-6-9" is in brown, because the person is missing according to her yearly star. (More information to be found elsewhere in the program.)

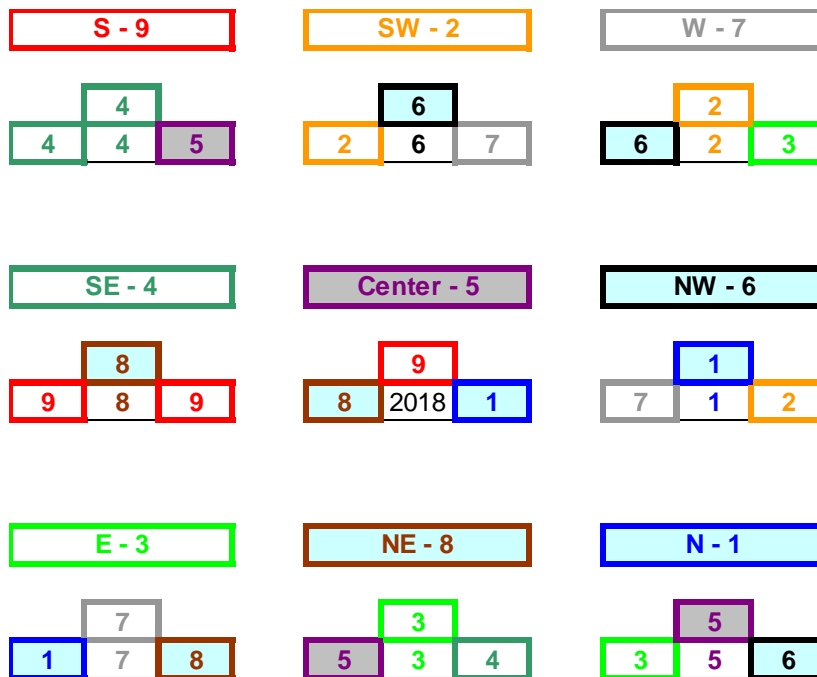

The Flying Stars are positioned around the map.

With the next step you may move them around by hand (each block is a separate image).

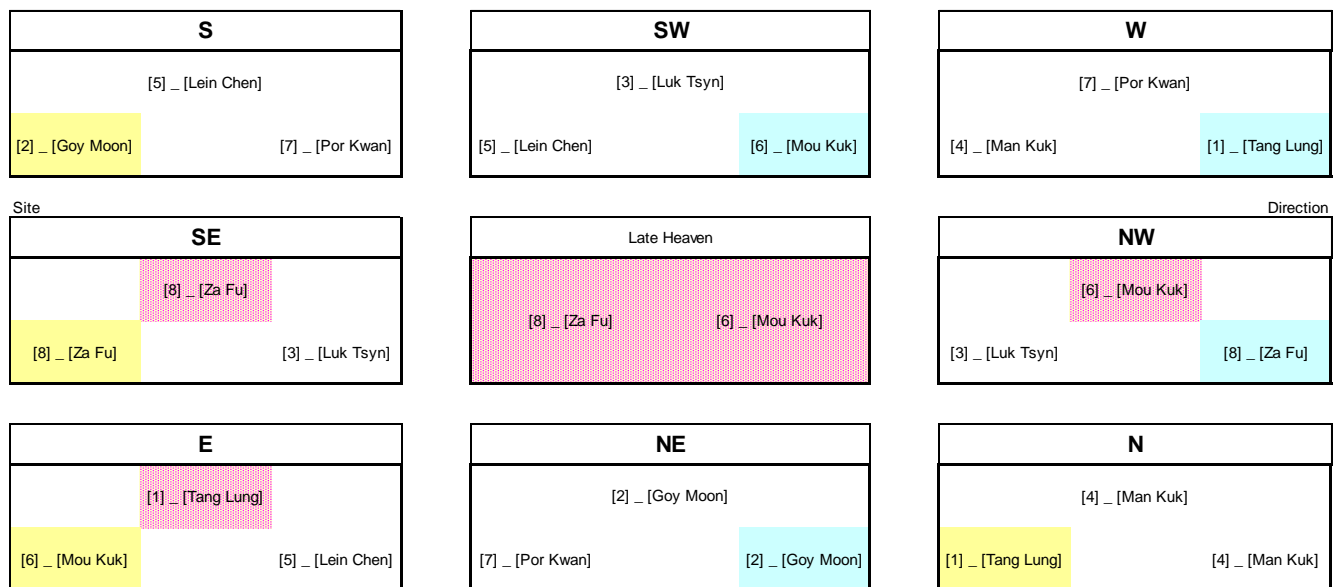

This way it's easy to evaluate the stars for specific rooms – and you may have to discuss with the client only those stars really important.

Some Flying Stars moved to single rooms here, according to their main direction.

This time the Stars have been calculated and displayed according to GM Chan, using the current period 9.

Ba Chop in Terminology of GM Chan.

In any case it's up to you whether you want to stay with the numbers alone or add some explanation; and you may choose from a lot of designations or provide your own.

On the following page the Four Pillars are combined with the data for Facing and Site – which sometimes can give valuable insight.

Here you can see a very deep connection between the person and the object, reflected in very strong combinations in the pillars.
